1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrases "tungsten carbide based cemented carbide", "titanium carbonitride based cermet" and "cubic boron nitride based sintered material" in the claims render them indefinite. This rejection can be overcome by deleting the word "based" from these phrases.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Sakurai (6,309,738).

Sakurai discloses the claimed TiAlN alternating layers with the claimed Al proportions (column 2, lines 61-64) and thicknesses (column 2, line 58), made by the claimed method (see example I).

5. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobe Steel (JP 11-061380).

6. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Sumitomo Electric (JP 07-097679).

Sumitomo Electric discloses the claimed TiAlN alternating layers with the claimed Al proportions and thicknesses, made by the claimed method.
